

For large-sized tables

TPC5 SR6/SR12/SR30

Single axis NC controllers automatically start large-sized TSUDAKOMA NC rotary tables by receiving M-signals from machining center.

Easy programming by simple input of the interactive system.

In increments of 0.001° (standard), 0.0001° or 1 sec.

Ready to set optional functions easily.

- With an optional function of B signal, the workpiece number, block number and tilting angle command can be entered from machining center.

- Operation can be programmed by machining center.
With "remote mode + M" specification

(Parameter change) P.52
